

AVALANCHE[®] LANDSLIDE[™] DUMP INSERTS

Turn your pickup truck into the ultimate utility vehicle. Work more safely and increase productivity with the Avalanche[®] Landslide[™] Dump Insert. Haul, dump, and convey almost any landscape material such as soil, screening, gravel, sand, salt, wood chips, bark nuggets or peat moss exactly where you want it. Remote controls allow you to dump from inside or outside the cab. Benefit from electric-over-hydraulic power, fast installation, and corrosion resistance. The Landslide is compatible with all full size pickups.

You Never Regret Buying Quality

Landslide™ DUMP INSERT

Why let your workers climb into your pickup and empty a load manually—with shovels? Save yourself hours of unloading time. Electric-over-hydraulic power enables you to dump your load in seconds. Power up/gravity down dumping is powered by your truck's 12V DC battery. The dump insert is equipped with a remote control and wiring kit. You can install it in about 3 hours with easy 4-bolt mounting. We've built it to a high standard using North American components. That's what you've come to expect from Avalanche.

Cab Protector

Bolt-on cab protector has openings for visibility. It's available in painted carbon steel or stainless steel.

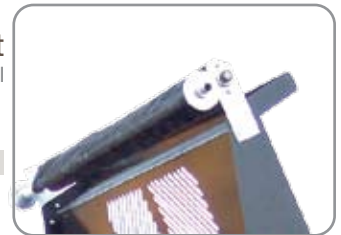

Part #	Description	Unit Weight
PDCP-CS	44W carbon steel	59 lbs
PDCP-SS	304 stainless steel	59 lbs

Tarp Roller Kit

Manual roll tarp prevents material from blowing out of insert.

Part #	Unit Weight
PDTR.	40 lbs

Options:

Replacement Tailgate Spreader

Why use a V-Box when you can harness the payload capacity of your dump bed? Isn't it great when you can stay on the job longer without returning to the yard to refill? Do more with your dump insert by adding an Avalanche replacement tailgate spreader.

Standard equipment includes a self-leveling spinner. A stainless steel electric auger motor gives you years of worry free operation. A removable cover protects the motor and wiring. An agitator with pre-mixing tines loosens material and ensures continuous flow. A removable spinner assembly enables handy sandbag and wheelbarrow filling. The dump feature provides top-pivot tailgate operation. The adjustable spread pattern ranges from 8' to 20'. In-cab on/off remote control and wiring harness is included. Models are available in 44w carbon steel and 304 stainless steel.

A Variable Speed Controller is available as an option. It has a Blast button for heavy material application. It also includes safety features like jam and overload sensing.

Model	Description	Unit Weight
PDBS-SS	Replacement tailgate spreader, 304 stainless steel	230 lbs
PDBS-CS	Replacement tailgate spreader, 44w carbon steel	230 lbs

Model	Description	Capacity	Volume	Unit Weight
PDB-06	6' dump insert, 44w carbon steel, for short bed trucks	6000 lbs (evenly distributed)	1.5 – 4.5* yards	573 lbs
PDB-06-SS	6' dump insert, 304 stainless steel, for short bed trucks	6000 lbs (evenly distributed)	1.5 – 4.5* yards	573 lbs
PDB-08	8' dump insert, 44w carbon steel, for full length bed	6000 lbs (evenly distributed)	2 – 5* yards	623 lbs
PDB-08-SS	8' dump insert, 304 stainless steel, for full length bed	6000 lbs (evenly distributed)	2 – 5* yards	623 lbs
